USER FIRST, DESIGN DRIVEN DEVELOPMENT.

I am currently searching for a position in which I have the freedom to create highly creative, engaging, and UX driven web sites and web apps.

web / design projects

Native Heart ATL

web design, wordpress development, logo design, brand development

Created mobile-friendly experience for online store, travel blog, as well as brand development including logo, color, typography, and art direction.

github.com/kemtopher/nativeheart nativeheartatl.com

Munilender

SVG & javascript animation, tweenmax api, logo design, brand development

Worked with start up founder to develop brand direction and look. Used multiple animation techniques together to create a unique introduction for the FinTech company.

github.com/kemtopher/munilender-landing munilender.surge.sh

Have it & PawedIn

ruby on rails full stack development, front end app development, active record, db design

Helped develop Ruby on Rails web apps, from the ground up while working with small team at Eastmont group. Assisted with creating active record models and REST api endpoints, creating and maintaining layouts, partials, and views. Devise and O Auth authentication and maintained the overall look and feel of brand across desktop and mobile devices.
